

Dear customers and friends of Brunton Engineering,

2017 has flown by! We all hope you have had a fantastic year and manage to enjoy a break in the weeks ahead. We have had some amazing support over this past year and wish to thank all of those people immensely and look forward to continuing that strong relationship during 2018.

Until next time,
The team at Brunton Engineering

WHAT CAN WE DO FOR YOU? BRUNTON ENGINEERING AND BRUNTON GROUP

While we are sure that some customers are aware of the range of skills and capabilities we offer, we are finding out frequently that some are unaware of the variety of work that we can complete for them.

Brunton Group is our project management team and inputs their energy into the construction and maintenance builds. The focus is on the custom builds from the ground level up to the final completion, handover and opening for our customer. Under this umbrella, we are able to offer services that include civil works, building foundations, telecommunications and fibre laying. We also offer a full project management service responsible for the coordination of the trades including the integration of fabrication and installation from our engineering workshop.

MERRY CHRISTMAS AND A HAPPY NEW YEAR

Over the holiday season we will be closing on **Friday, 22th December 2017 at 12.00pm** and reopening on **Monday, 8th January 2018 at 7.30am**. We have a small crew working through to service our site jobs in progress before returning with a full crew in early January.

We wish you and your families a very Merry Christmas and a Happy New Year.

WHAT CAN WE DO FOR YOU?

Automated fully retractable 24m aircraft gate built and installed by Brunton Group

Brunton Engineering focuses on the engineering, manufacture and fabrication around the country. Predominately a mild steel workshop, we have the facilities to complete stainless steel and aluminium work also. With Tony as our Workshop Foreman leading the workshop, and support from our Project Managers, Scott and Alex, our skill set allows us to complete a range of one off or production run items. Whether it be from the concept and design stage, or manufacturing from previously created drawings – we are able to assist. Our CNC plasma cutter is proving to be an excellent investment in the workshop and is reducing our lead times on many fabricated items as we have the ability to produce profiles in house now. So if it is a handrail or gate through to structural steel, we can help you out.

Between **Brunton Engineering** and **Brunton Group**, we have a formidable team that is ready and excited to help and assist you with your project and to get the results you require. No matter how big or small your project is, we look forward to seeing how we can assist you.

BRUNTON ENGINEERING EVENTS

CORPORATE DINNER

In late May, we held our annual Corporate Dinner and Networking Event gathering our customers together to say 'Thank You' for their support, share in our story and link up with other likeminded companies. We returned to the **Manawatu Golf Course** for this years event. As per previous years, our team had a fantastic night out and thoroughly enjoyed catching up with everyone that attended.

CHRISTMAS CELEBRATIONS

Tis the season, and so Brunton Engineering have been celebrating with staff and their families over the past few weeks. Our **family Christmas party** was held at Ashhurst Domain this year and brought our team and their families together for an afternoon of backyard cricket, rugby, and a visit from Santa

Our employees and their partners also enjoyed a night out for dinner at Lone Star. An excellent time was had catching up further with colleagues and partners in a relaxed social environment.

STAFF TRAINING AND ACHIEVEMENTS

Apprenticeships

Brunton Engineering is very proud to support two of our staff members who are in the process of completing their apprenticeship programmes through UCOL.

Our staff have had a busy year with training recently. While all our staff have SiteSafe construction passport, we also have a range of staff who are certified in Working at Heights, Confined Space and Gas Detection, Permit Receiver, Elevated Work Platforms, Forklift Operators, SiteSafe Supervisor Gold and Welding Tickets.

PROMOTIONAL MATERIAL

Promotional Video

It took a lot of blood, sweat and tears, but in collaboration with a media agency we were able to shoot, edit and create our fantastic video which further showcases the different aspects of engineering and project management that we have previously undertaken. Please take the time to watch this video as we are very proud of the end result -

Facebook

As an addition to our social media portfolio, we have joined into the world of Facebook as a way to communicate to everyone, what is happening around Brunton Engineering, projects we have are working on and coming up, and some of our employees travels. Please feel free to like our page to keep up to date with all our latest news –
